

Millarville Community School

May 31st - June 4th

Unit of Inquiry

The students are having a wonderful time with their new unit of inquiry. Last week we explored different objects to see if they would sink or float. The students also had fun creating tinfoil boats and manipulating the structure of the boat to try and make it sink. This week, the students will be exploring how to make floating objects sink as well as how to make a boat move through water.

Spelling

This week we will be focusing on **gh** and **ph** words. Our spelling words for this week are:
graph, phone, sphere, laugh, cough, photo, rough, enough, tough, and dolphin.

Math

Last week the students had fun making bar graphs and using the data to solve problems. This week the students will be continuing to learn about graphs and representing data. Next week, the students will be creating their own survey questions and using this data to create a graph.

Attribute of the Month Balanced

Students work to keep both their body and mind healthy. Students will understand the importance of balancing work and play. Students will understand by looking after their own health and happiness, they are able to help others be better

Housekeeping

We have library on **Thursday**. Please have your child return his or her books.

Please return home reading every Monday

Friday June 4th is a PD Day.
No school
